

HUBLOT

BIG BANG CAVIAR Red Gold Diamonds **BIG BANG CAVIAR Steel Diamonds**

More precious, more sparkling and more feminine than ever, the new steel or 5N red gold Big Bang Caviar, featuring a bezel set with 36 diamonds, is about to set the fashion world alight!

Based on the unique, iconic design of the famous One Million \$ Black Caviar, and directly inspired by the black ceramic Big Bang Black Caviar which has been one of the brand's bestsellers since 2011, these two watches, which boast an elegantly perfect diameter of 41mm, sport a sleek, graphic look with sharp angles and reliefs designed, cut, bevelled and polished like their big sister's black baguette diamonds. They are fitted with the HUB1112 self-winding mechanical movement and incorporate a date window at 3 o'clock, which connoisseurs are sure to appreciate. The strap of high shine black or silver calfskin leather sewn onto black rubber provides exceptional comfort, flexibility and resistance. With a power reserve of 42 hours, they are water-resistant to 10 Bar, equivalent to 100 metres.
