

Hublot Design and accessories CUFF LINKS

Directly inspired by the original, unique and chic design of Hublot watches, Hublot cufflinks are real jewels. The look of these cufflinks is a nod to the bezel of the famous Hublot watches, including the six screws which grace the bezel, the brand's signature. They also sport the engraved H of Swiss luxury brand Hublot. The case and the layout of the Hublot cufflinks are identical to those of the brand's watches.
