

## Hublot unveils the King Power FC Bayern Munich

To underscore their strong partnership, the luxury watch brand HUBLOT and record champions FC Bayern München have worked closely together with true team spirit to develop a collective masterpiece. The “King Power FC Bayern Munich” is now on display in the heart of the legendary FC Bayern München club.

The eagerly awaited timekeeper was ceremoniously unveiled in the presence of Jean-Claude Biver (Chairman of HUBLOT), Karl-Heinz Rummenigge (Executive Board member of FC Bayern München AG), FC Bayern players (including Ribéry, Boateng, van Buyten, Luiz Gustavo, Can as well as the newly acquired Shaqiri and Pizarro) and selected representatives from the German and Swiss press.

The titanium chronograph with a 45-minute display specially developed for football is limited to 200 pieces. The exclusive timepiece perfectly reflects the passion and shared values of the partners.

The Swiss luxury watch brand Hublot, known for its Art of Fusion, is proud to be the FC Bayern München’s partner and official timekeeper. Both are masters of their field and live to combine their art and traditional values with innovative vision. Hublot was the first Swiss prestige watch brand to embrace the sport of football, back in 2006, and has since made its mark in the world of top-class football through its collaboration with FC Bayern. The jointly developed watch is not just a crowning symbol of the staunch alliance, it is also an expression of the close friendship between the two greats on the playing field.
