### MUSÉE OCÉANOGRAPHIQUE DE MONACO

---

For the first time, the famous Oceanographic Museum of Monaco, with the Institut Océanographique Fondation Albert 1st Prince de Monaco - names renowned throughout the world in the fields of marine studies, research and conservation - has agreed to be associated with a watch. Quite some symbol.

By choosing to support the Oceanographic Museum of Monaco, Hublot has decided not only to honour the history and unique heritage of the prestigious Monaco institution, but has also chosen to give its active support to the study and preservation of the oceans by making a financial contribution to the missions and scientific surveys conducted by the Institute.
