OVERVIEW

- A. Hour hand
- B. Minute hand
- C. Second counter
- D. Telescopic crown
- E. Power reserve display
- F. Double "one click" system to attach the 3 accessories

INTRODUCTION

The extraordinary Arsham Droplet emerges from Hublot's collaboration with Daniel Arsham as a horological phenomenon that defies epochs. This timepiece interlaces Arsham's distinctive sculptural concepts with Hublot's horological innovation, presenting a reimagined pocket watch for the future and pushing boundaries of traditional watchmaking. The versatile Arsham Droplet transcends convention as a pocket watch, a necklace pendant, and a table clock - three exquisite forms of utilisation.

A captivating fusion of past, present and future. Its distinctive rounded silhouette is inspired by the organic, fluid forms found in nature, a water droplet. It fuses titanium, rubber, and sapphire crystal into an ergonomic marvel of unparalleled complexity that invites touch and exploration. At its heart beats Hublot's iconic in-house Meca-10 movement, achieving a remarkable 10-day power reserve within its compact form.

QUICK START

CROWN FUNCTIONS

Crown positions:

0. Neutral position
1. Winding
2. Time setting

WINDING

This function accumulates the energy required by your watch to run properly.

USE

Manual-winding

Your Arsham Droplet piece is equipped with a hand wound movement and offers a power reserve of approximatively 10 days (240hours) - to wind your watch:

1. A push on the crown allows it to come out automatically (from position 0 to 1).

2. Turn the crown at 12 o'clock in clockwise direction to wind the movement.

3. A push on the crown allows it to return to the neutral position (position 0).

TIME SETTING

This function enables you to set the time of your watch using the crown.

USE

1. A push on the crown allows it to come out automatically (from position 0 to 1).

2. Pull the crown outwards to place it in the time setting position (position 1 to 2).

3. Turn the crown to set the watch to the correct time. Push back the crown to the neutral position (position 0)

Note: If you are in the time setting position (2) and want to wind your movement, you cannot return to the winding position (1) directly.

You must push the crown to return it to the neutral position (0), then press it again to put it in the winding position (1).

POWER RESERVE

INDICATOR

The MECA-10 movement (HUB1201) is fitted with two parallel barrels with a power reserve indicator using a rack system.

At 12 o'clock, two racks slide on a 9 o'clock to 3 o'clock axis thanks to a rack and pinion system. The 10-day power reserve has a dual display.

At 3 o'clock, an opening gradually reveals a red spot during the last 2 days of the movement's charge.

At 6 o'clock, a crown gear marked from 0 to 10 indicates the remaining days of the power reserve.

DOUBLE “ONE-CLICK” SYSTEM

USE

Attaching the pocket watch with any of these accessories is a simple process:

F - pushers

1. Insert the quick release of the accessory into the pocket watch socket. Once it has reached the stop, the pocket watch has been clipped and is securely attached.
2. To detach, press both pushers (F) at once using one hand, and use your other hand to pull away the accessory.

CHAIN CLASP

USE

The chain included with your Arsham Droplet piece features an innovative clasp that securely locks with a simple click motion. This system allows automatic locking as soon as you approach the 2 ends of the necklace.

1. To unlock the clasp properly, simply hold each of the tips with a different hand, well pinched on the ribbed tip and Hublot engraving (red zone).
2. Finally, just pull in the opposite direction to open the system.

Do not pull on the rings as this will not release the clasp.

CHAIN CLASP

USE

If the system becomes locked-up, simply push the grooved ring towards the side of the loop.

When the system resets, a clicking sound will be heard.

Visually, a misalignment between the ring and loop will indicate that the clasp is operational again.

HUBLOT INTERNATIONAL GUARANTEE

Manufactured in the purest Swiss watchmaking tradition, your Hublot watch has been individually tested to ensure its optimal functioning and water resistance. An international warranty covers your watch against any manufacturing defects (the "**International Warranty**") under the terms and conditions described below.

All Hublot watches purchased from our official network, whether in one of our boutiques, from one of our authorized retailers, or on our e-commerce site (our "**Official Network**") are covered by this International Warranty.

International Warranty Period

- **For watches (excluding *HUBLOT Certified Pre-Owned watches*) purchased through our Official Network starting January 1, 2026:** Your watch is covered by an international warranty for **five (5) years** from the date of purchase.
- **For all other watches purchased through our Official Network:** Your watch is covered by an international warranty for **two (2) years** from the date of purchase. This specifically concerns:
 - Watches purchased on or before December 31, 2025.
 - All smartwatches, regardless of their date of purchase.
 - All *HUBLOT Certified Pre-Owned watches*, regardless of their date of purchase.

What the International Warranty covers

Hublot undertakes to repair any malfunction of your watch resulting from a manufacturing defect free of charge. Replacement of the battery in a quartz watch will be provided free of charge. It is important to note that battery replacement service does not cover the overall condition or other functions of the watch and does not imply that no other service is required.

HUBLOT INTERNATIONAL GUARANTEE

This International Warranty will only be valid throughout our Official Network and in authorized Hublot Service Centers, regardless of the country in which your watch was purchased. You will find the complete list of Hublot boutiques and authorized Hublot retailers on the Hublot website at the following address: <https://www.hublot.com/fr-int/boutiques>.

What the International Warranty does not cover

The following are expressly excluded from the International Warranty:

- any defect or damage resulting from improper or abnormal use, an accident (e.g., scratches, impacts, dents, damage, or crushing of the case, glass, bracelet, or buckle, etc.), incorrect use of the watch, contact with aggressive or corrosive substances (e.g., acids, solvents, inappropriate cleaning products), or failure to follow the instructions for use and maintenance provided by Hublot;
- defects or damage resulting from service, handling, modification, or repair carried out anywhere other than at a Hublot boutique, an authorized Hublot retailer, or a Hublot Service Center, or through the use of components and/or accessories other than those recommended by Hublot;
- wear and tear due to normal use and aging of your watch, including any wear on surfaces due to normal use, scratches on the case, strap, crystal, or buckle, damage to surfaces, or contact with chemicals;

HUBLOT INTERNATIONAL GUARANTEE

- any defect resulting from contact with water if the watch has not been used in accordance with its water resistance specifications, if the crown or push-pieces were not properly closed, or if the water resistance tests recommended by Hublot have not been carried out regularly or by a Hublot boutique, an authorized Hublot retailer, or an authorized Hublot Service Center;
- Hublot watches and components that are not absolutely authentic;
- any watch that Hublot suspects has been lost or stolen. As such, Hublot reserves the right to refuse warranty coverage for any watch that has been reported as lost or stolen, including, but not limited to, if it is listed in a database of lost and stolen products.

What are the terms and conditions of the International Warranty?

To be covered by this International Warranty, the following conditions must be met:

- your watch must be covered by a valid international warranty at the time of the service request;
- the serial number engraved on the case must be perfectly legible, and no part of the case back or original serial number must have been removed, modified, falsified, altered, replaced, erased, damaged, or rendered illegible.

Failure to comply with the above conditions will render the International Warranty null and void.

HUBLOT INTERNATIONAL GUARANTEE

Limitations of terms and conditions

The International Warranty does not affect any other rights you may have under applicable national legislation, which may vary depending on the country where you purchased your Hublot watch. The International Warranty does not exclude, modify, or reduce these statutory rights. For a complete understanding of your rights, we encourage you to consult the laws of your country.

RECOMMENDATIONS & CARE

The constituent parts of your Hublot watch are all of the finest quality, and inspected under extremely stringent criteria. They combine to form a piece with exceptional water resistance, with certain models capable of reaching a depth of 4000 meters. To preserve these qualities, we recommend a complete overhaul every 3 to 5 years, since temperature variations, humidity, perspiration and repeated shocks may affect its water resistance as the years go by.

With its water resistant case and rubber, ceramic or carbon strap, or gold or steel bracelet, your Hublot watch can be washed easily. If the watch has an alligator strap, you are advised to take it off when bathing. Clean it regularly in lukewarm soapy water, rinsing and wiping down carefully with a soft cloth. After wearing your Hublot watch in seawater, please rinse it in fresh water.

BECOME A HUBLOTISTA MEMBER

Register your watch and join Hublotista – Hublot's owner club – to access exclusive privileges and experiences.

As a member, you will:

- Extend your watch warranty of about a year (subject to certain conditions)
- Attend exclusive Hublot's event all around the world
- Be first in line to access our newest and most exclusive watches.
- Manage your watches, in one convenient place.

To subscribe, create an account on **www.hublot.com** and register your watch.
