INTRODUCTION

Your BIG BANG IMPACT ONE MILLION HIGH JEWELLERY 45 MM represents the pinnacle of Hublot's audacious spirit, masterfully fusing Haute Horlogerie with High Jewellery. Marking the 10th anniversary of the Big Bang Impact Bang's unique setting, this exceptional timepiece asserts Hublot's fearless drive to push boundaries, crafting a daring three-dimensional gemsetting that integrates technical mastery with bold design. It proudly extends a distinguished lineage of rare, million-dollar creations, cementing its place among Hublot's most collectible and entirely diamond-set timepieces.

This extraordinary model showcases a revolutionary central flying tourbillon movement, appearing for only the second time in Hublot's history. This skeletonized marvel, supported from one side only with no upper bridge, intensifies both its technical complexity and captivating visual effect. Powered by the hand-wound caliber HUB9015, it boasts an impressive 120-hour (5-day) power reserve.

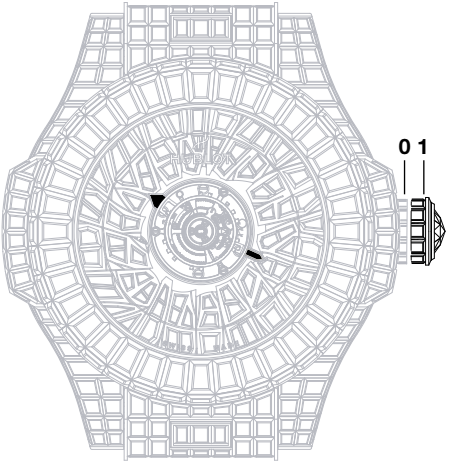

The 45 mm case, crafted in polished 18K white gold, is a canvas for an unparalleled display of light, adorned with 323 baguette-cut diamonds on the case and case-back, and a bezel set with 72 baguette-cut diamonds. The dial features 75 fancy-cut diamonds and the buckle 30 baguette-cut diamonds, bringing the intricate "Impact" motif to a total of 500 ethically sourced diamonds (GIA colour grade F–G) with VVS clarity, totalling 44.6 cts.

The BIG BANG IMPACT ONE MILLION HIGH JEWELLERY 45 MM is more than a watch; it is a profound statement of innovation and artistry, embodying ultimate luxury and avant-garde horological sophistication, designed for the discerning connoisseur.

CROWN FUNCTIONS

Crown positions:

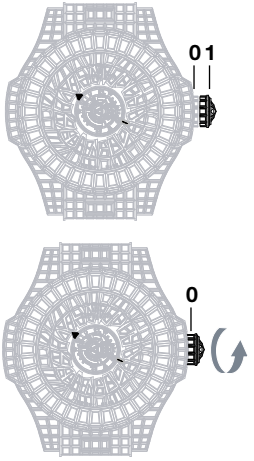

0. Winding (neutral position)
1. Time setting

WINDING

This function accumulates the energy required by your watch to run properly.

USE

Manual winding and power-reserve
Your BIG BANG IMPACT ONE MILLION HIGH JEWELLERY 45 MM watch is equipped with a manual-winding tourbillon movement and offers a power reserve of approximately 120 hours, which is nearly an entire week.

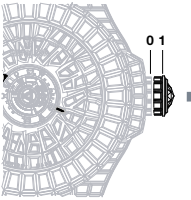

For the proper functioning of the watch, it is recommended to wind it every 4 days. This can be done manually by turning the crown clockwise until you feel a slight resistance at the end of winding. A complete winding is equivalent to 105 turns of the crown.

To perform this winding operation, ensure that the crown is in position 0.

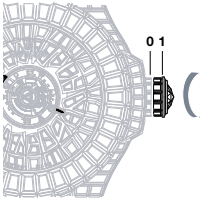

TIME SETTING

This function enables you to set the time of your watch using the crown.

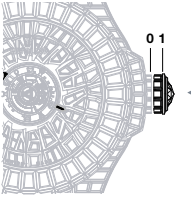

USE

1. Pull out the crown (C) to position 1.

2. Turn the crown (C) clockwise until you reach the desired time.

3. Push the crown (C) back to position 0.

HUBLOT INTERNATIONAL GUARANTEE

Manufactured in the purest Swiss watchmaking tradition, your Hublot watch has been individually tested to ensure its optimal functioning and water resistance. An international warranty covers your watch against any manufacturing defects (the "**International Warranty**") under the terms and conditions described below.

All Hublot watches purchased from our official network, whether in one of our boutiques, from one of our authorized retailers, or on our e-commerce site (our "**Official Network**") are covered by this International Warranty.

International Warranty Period

- **For watches (excluding *HUBLOT Certified Pre-Owned watches)* purchased through our Official Network starting January 1, 2026:** Your watch is covered by an international warranty for **five (5) years** from the date of purchase.

- **For all other watches purchased through our Official Network:** Your watch is covered by an international warranty for **two (2) years** from the date of purchase. This specifically concerns:
  - Watches purchased on or before December 31, 2025.
  - All smartwatches, regardless of their date of purchase.
  - All *HUBLOT Certified Pre-Owned watches*, regardless of their date of purchase.

What the International Warranty covers

Hublot undertakes to repair any malfunction of your watch resulting from a manufacturing defect free of charge. Replacement of the battery in a quartz watch will be provided free of charge. It is important to note that battery replacement service does not cover the overall condition or other functions of the watch and does not imply that no other service is required.

HUBLOT INTERNATIONAL GUARANTEE

This International Warranty will only be valid throughout our Official Network and in authorized Hublot Service Centers, regardless of the country in which your watch was purchased. You will find the complete list of Hublot boutiques and authorized Hublot retailers on the Hublot website at the following address: https://www.hublot.com/fr-int/boutiques.

What the International Warranty does not cover

The following are expressly excluded from the International Warranty:

– any defect or damage resulting from improper or abnormal use, an accident (e.g., scratches, impacts, dents, damage, or crushing of the case, glass, bracelet, or buckle, etc.), incorrect use of the watch, contact with aggressive or corrosive substances (e.g., acids, solvents, inappropriate cleaning products), or failure to follow the instructions for use and maintenance provided by Hublot;

– defects or damage resulting from service, handling, modification, or repair carried out anywhere other than at a Hublot boutique, an authorized Hublot retailer, or a Hublot Service Center, or through the use of components and/or accessories other than those recommended by Hublot;

– wear and tear due to normal use and aging of your watch, including any wear on surfaces due to normal use, scratches on the case, strap, crystal, or buckle, damage to surfaces, or contact with chemicals;

– any defect resulting from contact with water if the watch has not been used in accordance with its water resistance specifications, if the crown or push-pieces were not properly closed, or if the water resistance tests recommended by Hublot have not been carried out regularly or by a Hublot boutique, an authorized Hublot retailer, or an authorized Hublot Service Center;

– Hublot watches and components that are not absolutely authentic;

– any watch that Hublot suspects has been lost or stolen. As such, Hublot reserves the right to refuse warranty coverage for any watch that has been reported as lost or stolen, including, but not limited to, if it is listed in a database of lost and stolen products.

What are the terms and conditions of the International Warranty?

To be covered by this International Warranty, the following conditions must be met:

– your watch must be covered by a valid international warranty at the time of the service request;

– the serial number engraved on the case must be perfectly legible, and no part of the case back or original serial number must have been removed, modified, falsified, altered, replaced, erased, damaged, or rendered illegible.

Failure to comply with the above conditions will render the International Warranty null and void.

HUBLOT INTERNATIONAL GUARANTEE

Limitations of terms and conditions

The International Warranty does not affect any other rights you may have under applicable national legislation, which may vary depending on the country where you purchased your Hublot watch. The International Warranty does not exclude, modify, or reduce these statutory rights. For a complete understanding of your rights, we encourage you to consult the laws of your country.

RECOMMENDATIONS & CARE

The constituent parts of your Hublot watch are all of the finest quality and inspected under extremely stringent criteria. To preserve these qualities, we recommend a complete overhaul every 3 to 5 years, as temperature variations, humidity, perspiration, repeated shocks, and daily wear may affect its water resistance and the integrity of its precious settings over time.

Given the significant diamond setting on your BIG BANG IMPACT ONE MILLION HIGH JEWELLERY 45 MM , it is particularly important to handle your watch with care to prevent any damage to the stones or their settings. We advise against exposing your watch to harsh impacts or chemicals that could compromise the brilliance of the diamonds or the precious metal.

With its 30m water-resistant case and rubber components on the strap, your Hublot watch can be gently cleaned. Regularly clean it in lukewarm soapy water, rinsing and wiping down carefully with a soft, non-abrasive cloth. When cleaning, pay particular attention to the areas around the diamond settings to ensure no residue dulls their sparkle. After wearing your Hublot watch in seawater, please rinse it thoroughly in fresh water immediately.

BECOME A HUBLOTISTA MEMBER

Register your watch and join Hublotista – Hublot's owner club – to access exclusive privileges and experiences.

As a member, you will:

- Extend your watch warranty of about a year (subject to certain conditions)
- Attend exclusive Hublot's event all around the world
- Be first in line to access our newest and most exclusive watches.
- Manage your watches, in one convenient place.
